Colombo IOL Optical Biometer

Manufacturer: Shenzhen Certainn Technology Co., Ltd.
Address: L302, Bldg. 2, Skyworth Innovation Valley, Tangtou
No.1 Road, Bao'an District, 518108 Shenzhen, P.R.China
Website: www.moptim.com
Email: marketing@moptim.cn

Colombo IOL

Explore the innovative Colombo IOL, a cutting-edge optical biometer that utilizes SD-OCT technology for superior precision in measuring ocular biometric parameters, making it ideal for cataract surgery planning and myopia management. It allows comprehensive data measurements including AXL, keratometry, CCT, ACD, LT, WTW, pupil size, retinal thickness and choroidal thickness.

1 Real-Time Automated Fixation Check Ensures Reliability in Results

The Colombo IOL II, with its simultaneous cornea and retina imaging capabilities and automatic fixation checks, ensures accurate AXL measurements for reliable results.

2 4mm Retinal Imaging

The Colombo IOL features 4mm HD OCT imaging for retinal screening and includes choroidal thickness analysis capabilities for myopia monitoring.

3 Built-in IOL Formulas

Built-in IOL power calculation formulas such as Kane, Hoffer Q, Shammas PL, Shammas PHL, SRK-T, SRK II, and Holladay I ensure accurate lens selection.

4 Myopia Management Module

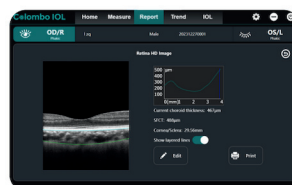

Colombo IOL incorporates a myopia management feature in its software, improving the overall effectiveness of myopia management.

5 Easy Operation

Auto tracking, auto shot for streamlined performance.
