BVI® Safety Knives

World Class Leader in High Quality Surgical Blades

- Single handed activation
- Consistent blade quality
- Safety options include Crescent, Sideport and Slit

Complete Portfolio

Phaco Slit/Keratome Knives

These knives are designed to make a precise incision size to accommodate the phaco tip.

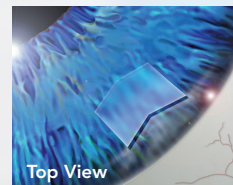

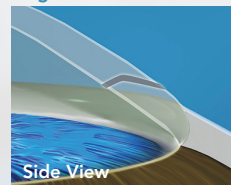

Safety Slit knives are designed for penetration and accurate incision width.

- Available in a wide range of sizes (1.4 – 3.2 mm)
- Single bevel and double bevel blade configurations
- Reference line guides a multi-planar incision

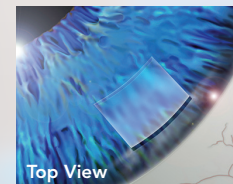

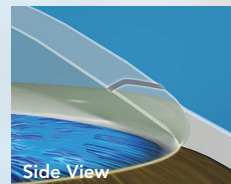

Knife Sizes	Reference Line From Tip
1.8 mm and 2 mm	1.75 mm
> 2 mm	2 mm

Single Bevel Incision

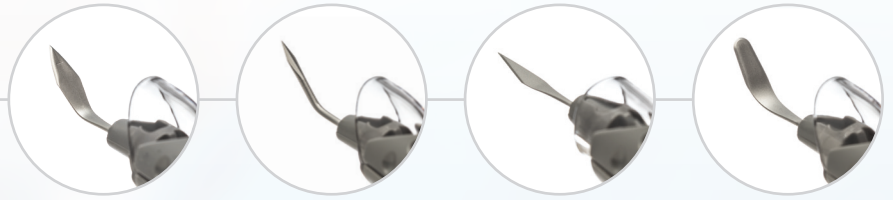

Double Bevel Incision

Safety

- True no-look, single-handed activation
- Integrated retractable shield prevents sharps injuries during handling and use
- Activated with a slider that provides tactile, visual and audible feedback
- Safety shield does not interfere with grip, offering better control during use

Paracentesis/Sideport Knives

These knives are designed for accurate width stab incisions.

The angled **Safety Sideport** knives create a consistent incision size.

Optimum® Safety Sideport knives enable the surgeon to control the incision width by varying the depth of the incision.

Crescent Knives

These knives are designed to create optimal scleral tunnel architecture. They can also be used for trabeculectomy and lamellar dissections.

Available in angled, bevel up configuration

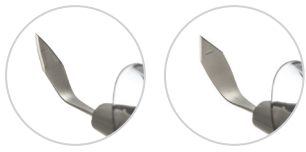

Consistency

- Advanced proprietary manufacturing process, delivers consistency in sharpness
- Safety shield protects blade against inadvertent damage ensuring a consistent incision

Sharpness

- Enables surgeon to maneuver the blade and optimize incision architecture
- Designed to deliver precision
